Early detection is the key to successfully treating skin cancer.

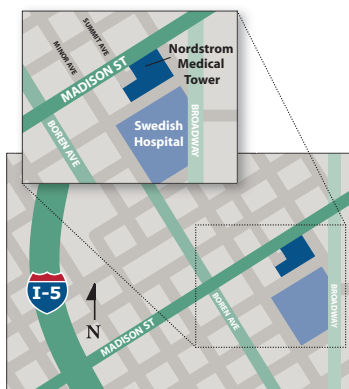

DERM **ACCESS**

A Service of Seattle Skin Cancer Center

Derm Access is the Seattle Skin Cancer Center's "fast track" pathway for prompt evaluation of potential skin cancers and suspicious skin lesions. You can see a skin cancer specialist shortly after making an appointment. If a biopsy is needed, it can be performed at the same time.

The Seattle Skin Cancer Center is a state-of-the-art center specializing in the evaluation and treatment of skin cancer. Our facility is certified by Medicare and the Accreditation Association for Ambulatory Health Care, Inc.

***Derm Access* provides evaluation and treatment of a single suspicious skin growth. It is not for a complete skin examination or non-growth skin problems. You will be asked to identify the single site of concern. If needed, we can help coordinate care for additional skin concerns with your primary health care provider or one of the excellent dermatologists we know.**
